

Cartesion Prime SP

Realizing the Operational and Financial Benefits of a Fully **100%** Air-Cooled Digital PET System

Canon's Digital PET-CT solutions deliver everything you expect.

Meaningful Innovation as a Trusted Partner

“There are a lot of variables among sites, and a lot of planning required. The chiller adds a layer of complexity.”

—Charles E. Baringer,
General Superintendent,
Summit Construction

While the chiller cost is included in most systems, it does add additional dollars to the total cost of a PET-CT and may have to be replaced during the life of the scanner.

Chiller
\$75,000¹

Additional maintenance costs are associated with chillers to inspect the lines and operation of the unit every year.

Maintenance
\$110,000¹

In addition to lower installation and lifetime maintenance costs, the Cartesion Prime SP has shown to provide a system uptime of over 99%.¹
