

There are three **primary reasons** that those in the medical industry are focusing on **comfort care**:

- If a patient is comfortable, they are more likely to hold still.
- Patients who are made more comfortable during their care are imaged more quickly.
- A patient who has a good experience is more likely to come back.¹

Comfortable Experience

"The Area Finder provides **faster** and **more comfortable** scans of the hand, wrist and elbow; it is as easy as taking a plain X-ray. This is truly a new way of performing CT examinations of the extremities which enables scans to be performed for patients in severe pain, who may not be capable of lying on the table."²

— Willem Jan van der Woude
CT Specialist Radiographer
Radboud University Medical Center
Nijmegen, the Netherlands

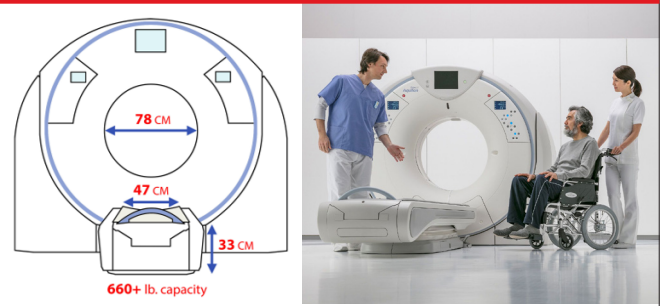

A successful exam begins with a comfortable patient

Tech Assist Lateral Slide³

- Mechanically move the table right or left, up to 42 mm, to the desired position with the push of a button
- Helps reduce the risk of injury to the patient and the user

Wide Table with Low Table Height

- Table can lower to 33 cm from the floor for easy patient loading
- Wide 47 cm table benefits patient comfort and positioning
- 660+ lbs capacity table to scan a greater range of patient sizes

Intelligent Gantry Design

- Unique, flared gantry is designed to help improve patient access from either side
- The 78 cm wide bore patient aperture enhances patient comfort
- Ability for user to initiate the scan from gantry for added patient safety

Area Finder/Laser Collimation³

- Allows the field of view and scan range to be set directly on the gantry
- Position patients more comfortably
- Examinations are performed faster
